MEMORANDUM FOR: Mr. Roger Pajak
National Intelligence Advisor
Department of the Treasury

SUBJECT : Data on Soviet Nickel Export

1. I have attached the data that you requested on Soviet nickel exports, listed by country. The Soviets do not report nickel trade. Consequently, we obtained the data from United Nations trading partner country statistics. Each page shows nickel imports from the Soviet Union for each reporting country. Unfortunately, many countries do not report trade statistics to the United Nations and therefore these data do not yield total Soviet nickel exports. Data for 1982 are not currently available from the United Nations.

2. If you have questions about these data, don't hesitate to call

United Nations data are currently available only through 1981; a dash (-) indicates that the country listed did not report data for that year (different than zero); imports are in thousands of current US dollars; quantities (listed as MQUAN) are in metric tons; "Novalue" categories indicate that the country reported imports for that category in a unit of measure other than tons (for this category, only dollar values are given); values for each category were reported separately by each country and, in some instances, unwrought and worked nickel imports do not add up to total nickel imports.
